

MORE SPECTACULAR DISCOVERIES IN THE VALLEY OF THE KINGS

–after the Discovery of the Tomb of Tutankhamun by
Howard Carter in 1922

ONSDAG 6 FEBRUARI KL 18:30 2019

After the final clearance of the tomb of Tutankhamun in 1930 there was the general opinion that the Valley of the Kings was completely exhausted, not anymore containing further treasures or tombs. For quite a long time no archaeological investigations took place until the late 1970. From 1990 onwards several excavations were conducted in the Valley of the Kings revealing spectacular results including new tombs, clear traces of the workmen who built the royal tombs, the identification of the owners of undecorated tombs, as well as a text, in which a further not yet localised tomb of a women is mentioned.

Med **Prof. Andreas Dorn**, Uppsala universitet.

Obs! Föredraget är på engelska och föregås av föreningens årsmöte.

Plats: Östermalms Föreningsråds lokaler, Valhallavägen
148, T-banestation Karlplan.

Inträde: 50 kr för medlemmar och 80 kr för icke-
medlemmar (end. kontant), efterföljande fika ingår.
